LINK SYSTEM MEMORISATION

- Transform data into an image form and create associations.
    - To remember any number of things in sequence, a vivid mental picture story called a MNEMONIC assists memorisation.
        - Focus points are used to 'hook' the story.

Mnemonics (pronounced ne-monik) is a memory aid in the form of a word, phrase or story. It is derived from a Greek word 'mnemonikon' – an art of memorisation.
